Soc. 4.01.2-Khrushche U J Remembers Junkovsky Aper

THE WORLD

—After years of virtually complete oblivion, Harold A. R. (Kim) Philby, the British diplomat-journalist who was a top spy for the Soviet Union, emerged briefly last week to tell a Czech interviewer in Moscow that the controversial book "Khrushchev Remembers" was actually concocted by the U.S. Central Intelligence Agency. He said the CIA also was behind "The Penkovsky Papers," which purported to reveal Soviet espionage activities. He said the manufacture of such books was a major CIA industry, with the "double object of confusing the opposition and making money." How is Philby spending his time in exile? He is "working on several books, including my own memoirs"—presumably with the full approval of the CIA's Soviet counterpart, the KGB.
